Transformation Thursday

Receive a \$15 discount on each Obagi product the last Thursday of every month.

Wrinkle Free Friday

Receive 25% off your BOTOX® Cosmetic procedure every Friday. Spots are filling up quickly - call to schedule your appointment today.

Skin rejuvenation treatments help treat skin damaged from sun and pollutants

These days, men and women of all ages seek skin care treatments to help maintain more youthful skin. Although they have different budgets, expectations, and problems with their skin, they also have something in common. What they share, are multiple problems with their skin from years of over exposure to sun and pollutants.

Some of these problems lie in the very superficial layers of the skin, while others are in the deepest layers. Most patients are very happy to hear that many problems in any layer of the skin can be safely treated with laser therapy, and without surgery.

By using the 2-D approach with the Cutera laser system, we are able to rejuvenate the skin in the superficial, mid, and deep dermal layers. This improves color, texture, and tautness of the skin. At Cosmetic Solutions we work to develop a treatment plan to help you achieve results, while staying within your budget.

[Vibraderm](#) is a microdermabrasion system that gently removes the outermost layer of dead skin cells, leaving skin smoother, softer, and more luminescent.

[Laser Genesis](#) utilizes non-invasive laser technology to treat fine lines, large pores, and uneven skin texture. It also diffuses redness and scars safely and effectively. The laser energy stimulates dermal collagen re-growth, and destroys tiny microscopic vessels leaving skin smoother and softer with a more even tone.

[Titan](#) utilizes infrared light to heat the water within the dermis to the point of collagen contraction. This process stimulates production of new collagen, leaving skin looking and feeling firmer. This is one of our most popular treatments, because it is non-invasive, with no "down-time".

The combination of these treatments can leave your skin looking and feeling more youthful with softer, smoother, and firmer skin that has even skin tone. These results can be maintained with periodic laser treatments and medical grade skin care products tailored to fit individual needs.

Door prizes include facials, vibraderms, cosmetics, and a \$1,000 Cosmetic Solutions gift card to be used toward any of our Laser or Aesthetic treatments.

Specials available July 14 only.

Staff Favorites

Stephanie Baumann, Staff Coordinator,
3 years with Cosmetic Solutions

"My favorite product is the Jane Iredale Amazing Base Loose Minerals makeup line. I have never been one to wear a lot of makeup, but I love this makeup line. The foundation offers incredible coverage and it doesn't even feel like you have any on. It is free of oil, talc, dyes and parabens, so you don't have to worry about it irritating your skin. I also like that it has UVA/UVB SPF20 to give me a little extra protection from the sun."

Cosmetic Solutions now offering eyelash and brow tinting

Wearing mascara can get messy on the beach or in the pool. However, for women who prefer not to leave home without wearing mascara, there's a solution to looking your best while enjoying nature's best. With eyelash tinting, you will always have dark, tantalizing eyes without ever having to use mascara.

Eyelash tinting is a process wherein your eyelashes or brows are dyed to make them look darker. Depending on your skin type and hair color, you can select eyelash colors, including black, blue, shades of

brown, grey or whatever color best fits your complexion.

Eyelash tinting is ideal for people who are sensitive to make-up, people who are active in sports (especially swimming) and people who have no time to apply make-up. It can also be ideal for people who wear contact lenses.

The process involves a quick and non-surgical procedure that will take around 15 minutes. Once you arrive at the salon, the therapist will place cotton under your closed eyes and then apply a small amount of dye onto your eyelashes. After ten minutes, the dye is removed with water. The results last around four to six weeks.

Eyelash and brow tinting is a natural process. For this reason, most salons and spas cannot lighten the color of your natural eyelashes.

Is eyelash and brow tinting dangerous?

One of the most common questions among patients interested in tinting their eyelashes or brows is if it's dangerous. Since eyelashes and brows are close to the eyes, it is important to ensure that the procedure is performed by a trained professional.

Home tinting kits should be avoided. The treatment can be messy, and it could also yield results that are not as effective as those done in the salons.

The treatment should be painless, unless the dye gets into your eyes and causes slight stinging.
