## Aging beautifully with leading skin care products

This month's newsletter features the Skin Medica skin care line. As many of you are aware, Cosmetic Solutions also carries the Obagi line, which will be featured in a future newsletter. Both are medical-grade skin care lines that complement each other, and many people use products from each line.

As our skin ages, elasticity decreases, lines emerge and overall appearance is diminished. To counteract the effects of time, Skin Medica products contain restorative ingredients that work to regenerate the health of the skin. The impact is clear - fine lines are reduced, age spots and discoloration fade, and skin texture and elasticity improve. Improvement and maintenance of skin helps us to look and feel great.

TNS Essential Serum is one of the best anti-aging products on the market today. In fact, the anti-aging serum gained national recognition recently when it was featured on "The Doctors" TV show.

TNS Essential Serum is a potent mixture of human growth factors, antioxidants, peptides and several other anti-aging ingredients. It contains 14 essential components that are needed for optimal results.

- Benefits of the anti-aging serum include:
  - Improvement of fine lines
  - Overall improvement of skin tone and texture
  - Smoothes and tightens skin
  - Strengthens the skins natural ability to regenerate itself
  - Fights against environmental damage
  - Brightens skin and lightens age spots

Studies have shown results in 1 month and reduction of coarse wrinkles by 44% in 3 months.

TNS Essential Serum is used separately or in conjunction with our laser procedures to maximize results.

In addition to the TNS Essential Serum, Skin Medica offers a complete line of skin care products. The clinically-tested formulas

Laser Hair Removal

provide delivery of vital components to the skin to improve damage caused by the sun, environmental assaults and aging.

### Featured Product: Clarisonic Skin Cleansing System

Clarisonic is an innovative skin cleansing system that uses a sonic frequency of more than 300 movements per second to cleanse the skin. The advanced system not only cleanses the skin, but also helps reduce dry patches, blemishes, and the appearance of fine lines and wrinkles.

As opposed to microdermabrasion products that abrade the skin, the Clarisonic uses sonic oscillation and the skin's natural elasticity to clean your skin gently and thoroughly. It can be used twice daily. When you use the Clarisonic cleansing system, you'll quickly notice results:

- Smoother, younger-looking skin
- Fewer oily areas, dry skin patches and blemishes
- Reduced appearance of fine lines, wrinkles and visible pores
- More effective makeup removal
